

Ramiro Nicolás Cosa

Digital Product Analysis, Development & Implementation

Neuquén, Argentina | +54 9 299 521-7189 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [ramirocosa.is-a.dev](#)

Profile

I analyze needs and build digital products for real workflows. Since 2020, I have designed and implemented my own web products and independent work with TypeScript, JavaScript, React, and Next.js. I work from workflows and states through implementation and quality, bringing more than 20 years of healthcare experience to HealthTech projects.

Selected projects

Clinical platform for home rehabilitation

● In development since 2020 · Local pilot · Fictional data · No public demo | Next.js, TypeScript, HAPI FHIR R4, Vitest, Playwright

- Structured workflows for inquiries, patients, treatment plans, and visits, including forms, validation, and follow-up.
- Modeled information with FHIR R4 and integrated HAPI FHIR locally, with automated tests and documentation.
- [Case study](#) | [Code](#)

Home rehabilitation landing page

● Public site · Analysis and implementation | Next.js, TypeScript, Tailwind CSS

- Responsive landing page for a home-rehabilitation service in Neuquén, with technical SEO, analytics, and WhatsApp contact.
- [Case study](#) | [Live site](#) | [Code](#)

Family Games

● Two games published | Next.js, TypeScript, Supabase, PostgreSQL

- Designed mobile-first flows to set up and play Impostor and Tutti Frutti across multiple phones.
- Impostor validates roles, voting, and scoring with PostgreSQL, RLS, and RPCs; Realtime syncs play and sessions recover after disconnections.
- Impostor has been played in more than 100 family games; observing them helped refine copy and flows.
- [Case study](#) | [Live site](#) | [Code](#)

Fira Estudio

● Independent work | Next.js, TypeScript, Supabase, Playwright

- Designed and built a responsive catalog, adapting the scope from e-commerce to fit the business's operating needs.
- Worked on accessibility, SEO, metadata, and unit and E2E tests.
- [Case study](#) | [Live site](#) | [Code](#)

Areas of work

Product and UX: discovery, workflows, states, business rules, scope, and operational experience.
Frontend and data: TypeScript, JavaScript, React, Next.js, HTML/CSS, PostgreSQL, and Supabase.
Quality: Vitest, Playwright, unit and E2E testing, RLS/authorization, Git, and documentation.

Professional experience

Healthcare experience since 2004 and digital products since 2020.

Digital product development

- Own products and independent work · Alongside healthcare practice | 2020 - Present
- Needs analysis and workflow and business-rule definition; web development and data modeling.
- Automated testing, documentation, version control, deployment, and maintenance.

Healthcare service coordination, review, and processes

- Alegria Salud and other home care services | 2013 - 2024
- Coordinated patients, families, clinicians, and administrative teams; reviewed service delivery and documentation needs.
- Took part in the joint creation of a palliative care service area.

Clinical practice and rehabilitation

- Independent practice | 2004 - Present
- Functional assessment, treatment planning, and follow-up; clinic-based work through 2013, followed by practice outside clinic settings.
- Clinical and sports rehabilitation with different teams and high-performance athletes.
